*Do you know how many opportunities there are in H2020 on ICT for health? Do you know what are the EU policies behind? This course will give you also the opportunity to comprehend how industrial partners could be involved in a health-related project. You will have the chance to take an helicopter view about the different possibilities in H2020 for ICT for Health supported by a mix of theory and practice. An interactive round table with successful applicants from industry, academy and research that will exchange with us perspectives about their participation on different funding schemes. There will be a special focus on AAL and EIP on AHA that will help you to better understand how they work and how you can promote them among your clients. Main trainers will be National Contact Points but the course will be enriched also by external experts from IBM who will cover the recurring concept of Big Data in health. The second day you will have the possibility to visit a local research infrastructure. **SAVE THE DATE and JOIN US!***
